

Vision Becomes Reality

COMPANION DIAGNOSTICS NETWORK

Innovative Companion Diagnostics for

- the stratification of patient subgroups
- all stages of pharmaceutical development
- the accompanying application
- pharmaceuticals that are already on the market

INDIVIDUALIZED THERAPIES THROUGH NOVEL DIAGNOSTICS

WHO WE ARE

The Companion Diagnostics Network is a high performance network of

- diagnostics providers
- device manufacturers
- leading research institutes
- clinics and medical laboratories
- expert partners

in the Berlin-Brandenburg region and beyond. Together we develop and manufacture innovative in-vitro diagnostic solutions for personalized medicine.

The network covers the complete value-added chain of in-vitro diagnostics. Each of our network partners has extensive knowledge and long standing expertise in its special field. For this reason, we are able to offer you a broad range of high-quality services and products.

Hereby, we specifically focus on

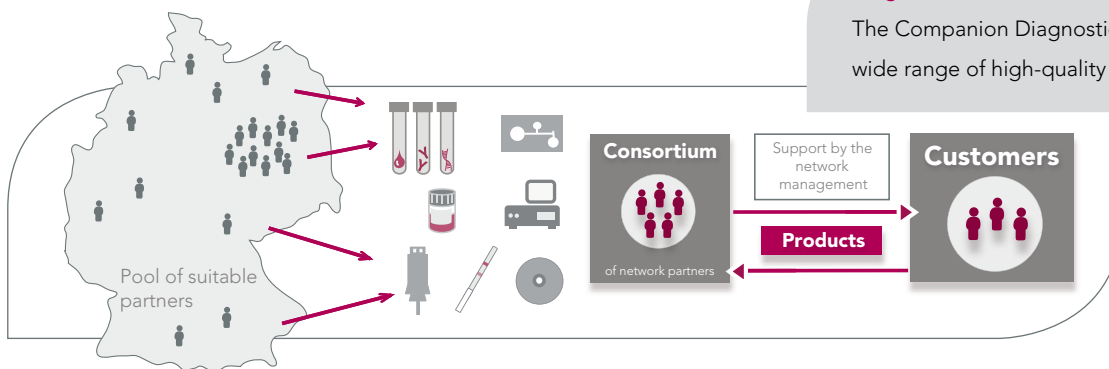

- multi-parametric applications (marker panels)
- point-of-care tests
- bioinformatics solutions
- internet-based platforms

YOU PROFIT FROM

- the combination of expertise of our network members
- our access to new technologies
- flexible and short decision-making processes allowing us to implement diagnostic solutions quickly and efficiently
- one contact person as general contractor to manage all your specific requests

Diagnostics from one source

The Companion Diagnostics Network offers a wide range of high-quality services and products.

Production

- design and execution of biomarker studies
 - biomarker screening | biomarker validation
 - genomics (DNA, RNA, epigenetics) | proteomics (peptides, proteins, antibodies) | metabolomics
 - establishment and maintenance of targeted biobanks
- requirement analysis | supply of biological raw materials
 - immunoassays | multiparameter and POC assays
 - custom expression arrays | custom SNP panels
 - tailored analysis algorithms | application specific software
- design and execution of clinical diagnostic trials
 - robustness studies | user studies
 - generation of CE & FDA approved software
 - CE mark | FDA approval
- design and execution of clinical diagnostic trials
 - marketing studies
 - STARD and CLSI compliant statistics
 - scientific publication
- provision of native human standard material
 - establishment of proficiency tests and EQAS
 - tailored detection systems | OEM production
 - ELISA | beads | automated systems | PCR | expression arrays | SNP panels
